

## Daimler Powerhouse Creation Centre, Coventry

### Redevelopment of Daimler Powerhouse

We worked alongside one of our regular Clients in undertaking a £2.5m renovation of an existing creative arts space for Imagineer Productions.

The building was originally constructed 1907 and is the only remaining part of Lawsons's Daimler Factory. The building stands on the site where Britain's first Daimler car was manufactured in 1897.

Our involvement included the introduction of new mezzanine floors, vertical extensions, specification of structural repair and remedial works and assessment of an historic trussed roof structure
